Medical Center Remodel and Addition
 General Contractor
 \$4,200,000.
 Lakes Regional Medical Center

Description

Brown Construction served as the General Contractor for the renovation and addition to the existing medical center. The 34 bed project had to be remodeled around the facility's 24 hour/day schedule. The project was broken down into two phases in order to maintain the Medical Center's high standards of service. Brown Construction worked closely with the Architect and hospital staff to perform the work in the most efficient manner possible, while keeping patient comfort and safety the highest priority.
